Location: Guadalajara Jalisco, México

PROFILE

- Experience as fullstack developer 12 years
- Experience as Lead Developer almost 6 years

TECHNICAL SKILLS

CONCEPT	DETAIL	YEARS OF EXP
Languages	JS, Java, HTML, CSS, TS, SCSS	10
	Python	3+
Frontend Frameworks and UI Libraries	React, Angular, Vue 2 & 3	9
	React Native, Redux, Svelte, Vue, ExtJS, CanvasJS, MorrisJS, ChartJS, SWR, ReactQuery, Remix, FabricJS, Tailwind, Bootstrap, GraphQL, Urql, Ant Design, Apollo, Ionic, Pinia, Quasar, PrimeVue	4+
Cloud Services	AWS, GCP	8
Backend Frameworks and Libraries	Express, Prisma, Sequalize, Hibernate, Spring, MyBatis, Loopback, Next JS, Meteor, Neo4j	8
	Django, Flask	4
Testing Libraries	Cypress, Storybook, Jazmine, Jest, Mockito, Spock, JUnit	4+
Project Management	Jira, Asana, TFS, Teamwork	9
Databases	SQL, Mongo, Firebase, DynamoDB	9
Others	Struts, Docker, Coverity, Black Duck, Octopus Deploy, Elastic Search, Jenkins, Redis.	4+
Backend (Node)	NestJS	6
ORM	TypeORM	3
	Knex	1
Backend (Ruby)	Ruby on Rails	3+

State Management	Zustand	2
UI Libraries	Material UI (MUI)	5
DevOps & IaC	CloudFormation, Helm	3+
	CircleCI, Argo (ArgoCD)	2
Container Orchestration	Kubernetes (AWS EKS)	5
AWS Services	S3	7
	IAM, CloudTrail	5
	SQS	3+
	EventBridge	2
	Aurora	1
Monitoring & Alerting	Splunk	5
	New Relic, OpsGenie	2
Code Quality & Security	SonarQube	7
	Checkmarx	1
AI Tools & IDEs	Cursor, Windsurf	3+
	Claude Code, Mastra AI, AWS Bedrock	1

EXPERIENCE HIGHLIGHTS

	Wizeline
POSITION:	Lead Fullstack Engineer.
DATES:	March 2025 – Current
MAIN ACTIVITIES DESCRIPTION:	• Build frontend applications with React, Material UI (MUI), and Tailwind CSS, managing state with Zustand. • Maintain backend services built with NestJS; one service uses the Knex ORM and another uses TypeORM. • Deploy applications using CloudFormation and CircleCI. • Run and deploy applications on AWS using EKS (Kubernetes). • Monitor applications using New Relic, Splunk, and OpsGenie. • Use Argo to review deployments, since direct kubectl access was restricted. • Deploy using Docker images. • Work with AWS services including SQS, DynamoDB, S3, IAM, EKS, CloudFormation, EventBridge, CloudTrail, and Aurora. • Perform Rollout and Blue/Green deployments. • Create custom Helm charts and CircleCI orbs to improve and automate deployments. • Write unit tests with Jest. • Monitor code coverage and code quality using SonarQube. • Scan dependencies for vulnerable libraries using Checkmarx. • Develop using Cursor and Windsurf AI-powered IDEs. • Create custom Claude Code skills to automate development workflows. • Implement AI automation using Mastra AI and AWS Bedrock.

	Deloitte
POSITION:	Sr. Fullstack Engineer.
DATES:	April 2024– March 2025

MAIN ACTIVITIES DESCRIPTION:	• Maintain Vue/Reac & Tailwind UI Application of current customer CRM. • Implement fixes for the current UX and model. • Monitor applications trough DataDog and Sentry • Deploy new versions using GCP with Cloud Build and Docker images for deployments. • Update current backend created with Spring and Ruby on Rails • Verify any error on the application code using Sentry and implement their required fixes. • Verify and test the new pixel perfect screens needed to develop • Manage MongoDB • Develop UI components using Quasar and PrimeVue. • Implement AI for user tracking behaviors and give insights to admins • Implementation of payment processor Authorize.net • Develop using Cursor and Windsurf AI-powered IDEs.
-------------------------------------	---

	Cognizant
POSITION:	Sr. Fullstack Engineer.
DATES:	Oct 2023– April 2024
MAIN ACTIVITIES DESCRIPTION:	• Maintain React UI Application to monitor the currently running jobs on GCP along the day. • Implement features/fixes for node jobs deployed en GCP to adjust to customer ongoing needs. • Monitor applications on kibana/GCP to verify any issues • Deploy new version with Jenkins against GCP Kubernetes instances. • Verify any error on the application code using Sentry and implement their required fixes. • Verify and test issues on customer files using GCP buckets and our different envs of kubernetes in GCP

	UST Global
POSITION:	Sr. Fullstack Engineer/ Lead UI
DATES:	Aug 2018 – Aug 2023

MAIN ACTIVITIES DESCRIPTION:	• Migrated 2 Applications to start using Java/Angular in frontendside. • Migrate legacy mono repo UI application to distributed UI created with React/Native following and implementing current standards/libraries of the company. • Implement and maintain 4 Backend jobs with node working as scheduled Jobs deployed on GCP • Verify PR and maintain coding standards on the UI side. • Planning of future implementations and releases required and prioritized for the project • Have constant communication with the company to satisfy customer requirements. • Versioning of DB to have a better control of the latest and stable version. • Detection and correction of possible security issues along with Blackduck, coverity and SonarQube • Verify and improve the compilation times and loading times of the application, • Analysis and implementation of new unit testing in order to have the minimum percent of coverage. • Implementation of DevOps through Octopus deploy and TFS, Docker to deploy our app.
-------------------------------------	---

	Improving
POSITION:	PM/Lead/ Sr. Fullstack Engineer.
DATES:	Sep 2017 – Aug 2018
MAIN ACTIVITIES DESCRIPTION:	• Created one angular app from scratch in one project. • Maintain two projects one with Java and another that was using React and Redux. • Manage a group of 7 people through the beginning of the project • Planning of future implementations and releases required and prioritized for the project • Have constant communication with the company to satisfy customer requirements.

	HCL Technologies
POSITION:	Sr. Fullstack Engineer.
DATES:	Feb 2017 – Sep 2017

MAIN ACTIVITIES DESCRIPTION:	• Creation of Angular components to connect them against ServiceNow • Maintenance of dashboard that has Java (Neo4j) React and GraphQL • Manage and develop the existing systems of delivery • Bring automated solutions to resolve conflicts that were developed to manage manually and were needed to be faster. • Programing based on flows that the user needs to accomplish to verify and prioritize thins • Constant communication with onsite partners to collaborate in the expected way • Maintenance of some modules with Angular
-------------------------------------	---

	Jaguar Labs
POSITION:	Fullstack Lead/Developer.
DATES:	Jun 2016 – Feb 2017
MAIN ACTIVITIES DESCRIPTION:	• Creation of multiple startup projects with Java, Angular and React. • Implementation solutions in payments issues to improve the server charges and distribution of money. • Implementation solutions to intercommunicate many electronic devices among different offices of our customer • Solution for concurrent routes and appointments to have better response times to the customer. • Maintenance of some modules with Angular

	IsWeb AllDigital
POSITION:	Fullstack Engineer.
DATES:	Nov 2015 – Jun 2016

MAIN ACTIVITIES DESCRIPTION:	• Creation of multiple startup projects with Node Angular and React. • Develop new features and maintenance on webapps. • Tracing of routes for vendors in order to accomplish many sales in less time calculating the less effort possible driving. • Implementation of APIs with Java/NodeJS • Implement new features with React. • Implementation of google maps and tracking of users for live tracking. • Implementation of different budget calculations for different insurances in order to provide a different list of prices in the automobile industry.
-------------------------------------	--

COMPANY NAME:	Vinos America
POSITION:	Fullstack Engineer.
DATES:	Feb 2015 – Nov 2015
MAIN ACTIVITIES DESCRIPTION:	• Develop new applications required by the customer. • Warehousing and control on SKUS in the company. • Communication among different electronic devices to speed up the internal management of products. • Implementation of APIs with Java/NodeJS • Implement new features with React. • Creation of two mobile apps with React.

COMPANY NAME:	BPEJ
POSITION:	Fullstack Engineer
DATES:	Apr 2014 – Feb 2015
MAIN ACTIVITIES DESCRIPTION:	• Implementation of UI and backend solutions for better handling in the management of libraries. • Implementation of APIs with Java/NodeJS • Implement new features with React. • Optimization of querying records between millions of data to retrieve the data to the user in the faster way.

EDUCATION, TRAINING & CERTIFICATIONS

INSTITUTION	DEGREE	PERIOD	CITY
Universidad De Guadalajara	Bachelor in Computer Science	2012-2016	Guadalajara, Jal.
